

pinnacle. Studio™ MovieBox Plus

Your Life in Movies. Captured and Enhanced.

Product Overview

Pinnacle Studio MovieBox® Plus is a complete solution and provides users with a set of both automated and advanced video editing tools in an easy-to-use interface. Compatible with the new Windows Vista™ operating system, Pinnacle Studio Plus software includes the latest technology such as a complete HD workflow, with native HDV and AVCHD editing and disc burning on standard DVD media; and Hi-Fi audio music capabilities. The scalable user interface is perfect for working on today's wide screen monitors, while the new Web publishing feature makes it easy to share your movie creations publicly or privately. The high-speed USB 2.0 device captures video from any analog or digital source.

Key Features

- **New - From capture to editing and disc burning:** A complete HD workflow with HD DVD and AVCHD authoring on standard DVD media - Pinnacle Studio Plus edits native HDV or AVCHD footage and then authors HD DVD and AVCHD format discs that will play on the latest HD DVD and Blu-ray players. You can even combine projects that mix SDV, HDV and photos that are then "up-sampled" to HD resolution.
- **New - Now with cutting-edge AVCHD capabilities** - Pinnacle Studio Plus users can now import and edit the latest HD format, projected to become the primary HDV format for Camcorder leaders like Panasonic and Sony, allowing for more HDV content in half the space.
- **New - Windows Vista™ compatibility** - The perfect companion to the new Windows Vista operating system, Pinnacle Studio Plus Version 11 provides full compatibility and a sleek look while it offers complete video editing tools to do more with home video content.
- **New Scorefitter™ music generator** - Automatically generate soundtracks, now with 40 source tracks, which include greater variation and 48k audio samples for higher fidelity and increased accuracy than previous solutions.
- **New User Interface** - Pinnacle Studio's interface is scalable, making it perfect for working on widescreen monitors or adjusting the windows to get close to the task at hand while keeping all the tools at your fingertips.
- **New - Simplified Web publishing** - anticipating people's desire to share their video creations on the Web, Pinnacle Studio makes Web publishing automatic. Users can now post their movies publicly on Yahoo! Videos (more to come) or privately with just a few simple clicks.
- **New - Improved speed and performance:** - Pinnacle Studio Plus now installs faster and exports files of any type at speeds double* those previously possible. (* an average; results may vary)
- Advanced editing, effects, and integrated DVD authoring, all within an intuitive interface. Users can master more sophisticated video effects such as HD editing, custom key frames, Surround Sound editing, graphic overlays, scrolling titles, Picture-in-Picture or Chroma Key (green screen), and more.
- High-speed USB 2.0 device which allows users to capture video from any analog or digital source to make great movies from existing VHS or Hi8 tapes, or new DV camcorders with plug and play ease

Product Descriptions

25-Word Description

Pinnacle Studio MovieBox® Plus is a fully featured yet accessible solution that lets true video enthusiasts harness the power of the latest technologies—Windows Vista™, HD DVD, AVCHD, Hi-Fi audio and Web sharing.

50-Word Description

Pinnacle Studio MovieBox® Plus is a full-featured, Windows Vista™ –compatible solution that lets true video enthusiasts harness the power of the latest technologies and formats, including HD DVD, AVCHD, Hi-Fi audio and Web sharing, without compromising ease of use. It offers flexible plug and play video capture capabilities. Record "legacy" analog tapes or new digital video, then edit with powerful yet intuitive software to preserve and enjoy.

100-Word Description

Pinnacle Studio MovieBox® Plus is all about innovation. This full-featured yet accessible solution lets true video enthusiasts harness the power of the latest technologies without compromising ease of use. The included Pinnacle Studio Plus software has an extensive range of capabilities which include compatibility with the new Windows Vista operating system, HD DVD and AVCHD format editing and disc burning, Hi-Fi audio music generation, and automatic Web publishing.
