Studio™ MovieBox Ultimate

Your Life in Movies. Captured and Mastered.

Product Overview

Pinnacle Studio MovieBox® Ultimate combines the newest release of Pinnacle's best-selling consumer video editing software, Pinnacle Studio™ Plus Version 11, with a selection of popular professional audio and video tools, providing users with everything they need to take complete control of their video quality and style within an intuitive interface. Compatible with the new Windows Vista™ operating system,

Pinnacle Studio Plus includes the latest technology such as a complete HD workflow, with native HDV and AVCHD editing and format disc burning; and Hi-Fi audio music capabilities. The scalable user interface is perfect for working on today's wide screen monitors and the new Web publishing feature makes it easy to share your movie creations publicly or privately. The high-speed USB 2.0 device captures video from any analog or digital source.

Key Features

- **New** - The combination of Pinnacle Studio Plus Version 11 with highly-acclaimed pro audio and video tools create the ultimate solution for video enthusiasts who want to take complete control of the quality and style of their movie creations.
 - The BIAS SoundSoap™ Pinnacle Edition audio noise cleaning tools, plus complete Dolby® Digital 5.1 audio encoding ensure your movie creations will sound as good as they look.
 - proDAD® VitaScene provides the tools to add the kind of professional effects such as rays, blurs and more that really give your movies flair and a sense of style.
 - StageTools™ MovingPicture lets you use the same tool the professionals use to create precision pans and zooms, all in high resolution, while maintaining simplicity for stunning results.
 - The included Green Screen backdrop helps you create professional looking Chroma Key effects without the big studio.
- **New - From capture to editing and disc burning** - A complete HD workflow with HD DVD and AVCHD format authoring on standard DVD media - Pinnacle Studio Plus edits native HDV or AVCHD footage and then authors HD DVD and AVCHD format discs that will play on the latest HD DVD and Blu-ray players. You can even combine projects that mix SDV, HDV and photos that are then "up-sampled" to HD resolution.
- **New - Now with cutting-edge AVCHD capabilities** - Pinnacle Studio Plus users can now import, edit, and burn the latest HD format, projected to become the primary HDV format for Camcorder leaders like Panasonic and Sony, allowing for more HDV content in half the space.
- **New - Windows Vista™ compatibility** - The perfect companion to the new Windows Vista operating system, Pinnacle Studio Ultimate Version 11 provides full compatibility and a sleek look while it offers advanced video editing tools to do more with home video content.

- **New - Scorefitter™ music generator** - Automatically generate soundtracks, now with 40 source tracks, which include greater variation and 48k audio samples for higher fidelity and increased accuracy than previous solutions.
- **New User Interface** - Pinnacle Studio's interface is scalable, making it perfect for working on widescreen monitors or adjusting the windows to get close to the task at hand while keeping all the tools at your fingertips.
- **New - Simplified Web publishing** - anticipating people's desire to share their video creations on the Web, Pinnacle Studio Plus makes Web publishing automatic. Users can now post their movies publicly on Yahoo! Videos (more to come) or privately with just a few simple clicks.
- **New - Improved speed and performance** - Pinnacle Studio Plus now installs faster and exports files of any type at speeds double* those previously possible. (* an average; results may vary and depend on system specifications)
- Advanced editing, effects, and integrated DVD authoring, all within an intuitive interface. Users can master more sophisticated video effects such as HD editing, custom key frames, Surround Sound editing, graphic overlays, scrolling titles, Picture-in-Picture or Chroma Key (green screen), and more.
- High-speed USB 2.0 device which allows users to capture video from any analog or digital source to make great movies from existing VHS or Hi8 tapes, or new DV camcorders with plug and play ease

Product Descriptions
