## ▼ Video Capture for Mac

Price: £59.99

Company: Pinnacle Systems,

[www.pinnaclesys.com](http://www.pinnaclesys.com)

The Pinnacle Video Capture for Mac provides a fast, simple way to transfer analogue video into an iPod-native format. You can record video from any analogue source, including a camcorder, set-top box, games console or VCR. Videos are added automatically to iTunes,

ready to sync with an iPod or Apple TV. Ideal for converting ancient VHS tapes and preserving your memories, you will however need additional software such as iMovie if you want to edit the conversions. Video resolution is 640 x 480, which should be fine for standard definition TV, while the built-in MPEG-4 encoder frees your Mac's processor for other tasks.
